Tarras tracking and engles on Carras Streets

Foreword

I have pleasure in presenting you with my revised catalogue to date, and in doing so wish to take this opportunity of thanking all customers for their generous support and kindly recommendation to others. It is very gratifying to know that one's efforts to please are appreciated.

There is probably no branch of horticulture so full of interest and so rich in return of pleasure as the Alpine Garden. Hardly a garden of no matter how small a dimension but can boast of some sunny corner that would be suitable for a little rock garden

in which to plant wee treasures.

The greatest importance when building the garden should be attached to the kind of rock chosen and the soil intermixed therewith. Choose well weathered rocks of good appearance and place them in such a manner that the water will run back into the soil. The pockets should be large enough to receive several plants of the same variety, so that the whole effect when finished will not be spotted. The plants should be kept fairly moist in summer and given good drainage, and have a top-dressing in the Spring of sand and leafmold well mixed with grit. If small evergreens are interspersed here and there in the rockery it aids to elleviate the monotony during the winter months when all bloom is past, and bear in mind that only plants of harmonious colour values should be planted near each other in the rock garden.

A plant may be in good condition when received but it takes a thorough preparation of the soil at all times to make them

thrive and continue to maintain their vigorous growth.

Potted or Field Grown Plants

I have both potted or field grown plants and can supply most of these in either form. Many prefer field grown plants, considering them more hardy. Personally, I believe, and especially for Eastern customers, pot grown plants are best, as the roots are well maintained and seem to withstand packing and travel.

to better advantage.

I keep hundreds of saxifrages, androsaces, sedums, sempervivums in pots plunged in sand pits, along with other of the more valuable rock plants and alpines and supply them in quantities at short notice; and by the way, although I have not tabulated the price list of plants by the dozen or more, I can give a better price at this rate, always able to supply a dozen at the price of ten, and in some instances doing even better I make a specialty of rock wall plantings, growing hundreds of those plants that are especially adapted for that form of rock gardening.

Terms of Business

The prices quoted are for CASH WITH ORDER, unless satisfactory bank references are supplied. As my plants are all specially boxed, and no charge is made for packing, no order will be filled for mailing for less than \$2.50, postage collect, or allow 15% extra to defray cost of same.

Non-Warranty

My plants are grown under the very best possible conditions, no plant being sent out that does not satisfy me to be a perfect growing specimen. I therefore can give no warranty, expressed or implied, as to their being absolutely true to name, altho this is one of the subjects upon which I am crank, and I exercise every effort to see that my plants are as true to name as it is possible to have them, and knowing them to be in perfect condition when they leave my nursery, I cannot be held liable in cases of failure, due to travel or otherwise. Fortunately I have had only the very best reports as to their condition upon arrival and could fill a good sized pamphlet with kindly testimonials alone, from satisfied customers.

Shipping

I shall send, unless advised, all plants by parcel post collect.

Otherwise allow 15% to defray postage charges.
FALL SHIPPING SEASON begins the first week in September and extends usually until about the first week in November, according to weather conditions. Why not be on the safe side. and use small cold frames to winter late arrivals.

SPRING SHIPMENTS are forwarded according to customer's wishes and subject to weather conditions. March 1st until June

15th.

It is well to order early in order to avoid disappointment.

Price List

ACAENA (Rosaceae) Sun or shade, for carpeting. 1 inch. Argentea, neat little carpets of silver grey	
Buchanani. Dense carpets of pea-green	.25

Balerica. Carpeter with dark green foliage, minute white flowers, for damp shady location	.25
Montana. Large white flowers, fine for rock wall	.25
Purpureus. Lovely little carpeter with lavendar flowers. Choice	.50
ARTEMESIA (Compositae) Fine foliage plant, nice in rock wall, in sunny place.	
Frigida. Feathery soft grey foliage	.30
Mutelina. Prostrate, grey foliage, choice	.50
May - September. Bee's Ruby. Bright Rose	.25
Caespitosa. Choicest of a long family. Dwarf, com-	.75
pact and spiny	.10
Alpina. Large violet and gold daisies in June - July	25
Goliath. Large lavendar daisies, intense yellow centers Lichangensis. Choice Chinese Aster, 12 to 14 inches.	.25
Intense lavendar with dark eye	.75
foliage and large mauve blooms with intense yell- ow center	.50
Pliades. Dainty foliage, branching habit. A gem, comes late when bloom is scarce	.50
Thompsoni Nana. Daintiest little Michaelmas daisy	.75
Aster Garibaldii. Alpine aster from Mt. Garibaldi, decidedly good	.50
ASTILBE (Saxifragacae) Partial shade and some moisture. 6 to 8 inches.	
Simplicifolia. This from Japan. Lovely dwarf glossy foliage with the daintiest delicate spiraea bloom imaginable. July - August	.75

AUBRETIA (Cruciferae) I have beautiful grandiflora mixed	
varieties at	.25
My named varieties have nearly all been im-	
ported, as they do not come true to colour from	
seed, so I list the following named varieties from	
cuttings:	
Bridesmaid. Loveliest soft and delicate pink	.50
Carnival. Deep rich purple. A departure. Large flowers	.75
Hendersoni. Rich carmine	
Dr. Mules. Intense deep purple. One of the best	
Lavendar. Lumineus lavendar blue, large and superb	
Crimson King. Deep crimson	
Fire King. Bright Crimson.	
Lissadell Pink, deep pink with large flowers.	
Leitchlini, bright pink	
Pritchard's A. 1. Purple, white eye	
Russell's Crimson, choice. Deep carmine-crimson	.50
BELLIS (Compositae) Sunny spot in rock wall or stepping stones.	
Minutum. Smallest dainty daisy, constant bloomer,	
lovely little companion for Viola Bosniaca	.35
BRUCKENTHALIA (Fricaceae)	,50
Spiculifolia. Compact little feathery heather. Hardi-	
er than most heathers, and evergreen. Delicious	
	1.00
little pink blossoms for long period	1.00
CALTHA Ranunculacae) Moist soil in sun or shade. May -	
June. 6 inches.	
Leptosepala (our native Marsh Marigold). Waxen	0.5
bloom	.35
Palustris. Large yellow Marsh Marigold, fine for pool	0.5
margin	.35
CALCEOLARIA (Scrophularicae) Half shade in moist soil.	
June - July.	
Polyrhiza. Dainty little plant with lemon yellow	4.0
pouches	.40
CAMPANULA (Campanulacaea) Half shade or sun. May -	
September.	
Abietina nana. Dwarf type with lovely lavendar stars.	
Consistent bloomer	.50
Aucheri. Large rich purple bells on three inch stems,	
needs little protection in winter	.75
Barbata. This is the bearded bellflower of the high	
Alnina maadaws	50

Collina. Lovely species from the Caucasus. Foot-high branching stems, deep purple bells. June - July	.50
Carpatica. Isobel. Choice China Blue saucer, on lovely hairy stems and foliage	.35
Carpatica Riverslea Beauty. Lovelïest Carpatica, comes late and the richest blue	.35
Carpatica Compact Nana. Dwarf compact and lovely bells	.40
Fragilis. Dainty campanula on order of Isophylla. Lovely blue blooms and clean green foliage. Nice for sunny wall	.7 5
Macrohiza. Interesting type similar to Rotundifolia. Wide open cups. Blooms late in September, when bloom is scarce	.50
Muralis. I have both the Portenschlagiana and the Bavarica type. Lovely blue trailer, long bloomer	.35
Miranda. This is one of Mr. Farrer's special finds. Tubby little bells entirely cover substantial mats of lovely foliage	.50
Norman Grove Seedlings. Mixed, but fine types of the Norman Grove Hybrid	.50
Piperi. This is the most beautiful campanula in America. Native of Olympic Mountains. Beautiful large and glorified stars of intense blue, with glossy little holly-like leaves. A gem for a very choice spot. July - August. 4 inch. Fine es-	1.50

Standsfieldi. Choice creeper or rarest charm, deep pur- ple bells. August - September. Leafmold and	
shade Rainieri. Beautiful specimen from Italian Alps. China blue flowers, a little shade. Fine Plants. Very	. 7 5
Choice	1.50 .75
Pusilla. Dainty nodding bells on two-inch stems Pusilla Alba. Lovely white form of the above These	.25
are fine for stepping stonesPulla, G. F. Wilson. Lovely purple bells of rarest	.25
charm. This is one of the finest little treasures	.75

Raddeana. Campanula from High Alps, deep purple, branching bells	.40
Waldestiana. Rare and choice little campanula, rose- lavendar stary blossoms, half shade and leafmold	.75
CORYDALIS. (Papaveracae) Half shade, suitable for walls, constant bloomer.	
Lutea. Fern-like leaves and yellow flowers, lovely in wall	.35
Cheilanthifolia. Grey foliage and clear yellow blooms Ophiocarpa. Lovely foliage, tinted bronze and blue.	.35
Lovely spires of bloom in June-July. Choice Semenowii. Choicest little Corydalis. Dainty foliage,	.75
wee dainty yellow blooms, tinted pink at end. Shade.	.75
COTYLEDON (Crassulacae) On the order of Sempervivum. Interesting. Sunny place.	
Chrysantha. Pale yellow blooms on grey-green velvety foliage	.40
COTONEASTER (Rosacae). Splendid dwarf shrubs for rock garden.	
Adpressa. Quite prostrate. Dark green foliage	.75
for rock work — Shipping size	.50 .75
CORTULA (Leptinella) For stepping stones, or ground cover Squalida. Wee fern-like foliage. Forms solid mat	.25
DAPHNE (Thymelacae) Sun or half shade, deep gritty soil. Cneoreum. Garland Flower. Lovely little evergreen bush which clothes itself in Spring with most delicious and fragrant rosy trumpets. Shipping	
size	.75
CYTISUS (Dwarf Brooms) Full sun, light soil. Ardoini. Lovely rare wee plant, choicest little broom for rock garden — May - June	1 95
Dalmatica. Quaint little gorse of rarest charm. Kewensis. Lovely cream-colored prostrate broom	1.25
Nigregans. Splendid late blooming broom	
	1.00
blooms Pilosa. Dainty little prostrate broom, very choice	

Radiata. Rare little genista, leaves in whirls, and	
dainty silver foliage	1.25
Horrida. Choicest of dwarf gorses. Grey foliage.	1.50
ScarceUralensis. Splendid for very hot location	1.50
	1.00
DELPHINIUM (Ranunculacae) Alpine types for sunny	
places. Cashmeriana. Choice dwarf delphinium from Thibet	
18 inches	.75
Pylzowii. From Kansu, China. Beautiful violet blue	
flowers choice asset in moraine or rock garden	
14 inches	.75
Tatsienense. Another rare Chinese type of gentian	
blue. 14 inches	.75
DOUGLASIA. Laevigata, western native of much charm.	
Green rosettes, carrying dainties little rich rosy	
blooms with yellow eye	.50
DIANTHUS (Caryophyllacae) Sunny position, gritty soil. Alpinus. Blooms as large as a quarter, very dwarf.	
Deep pink	.35
Alpinus Carmineus. Beautiful carmine type of above	.50
Alpinus Alba. Good white form of Alpina	.35
Arvernensis, compact tufts of glaucus grey foliage,	
lovely pink blooms	.35
Aridus. Dainty alpine dianthus, with soft yellow bloss-	
oms	.40
Callizonus. Choicest of Alpine pinks, a treasure among	
treasures, large blooms in the form of Alpinus,	
lighter pink, dark central band, spotted white July - August. 4 inches	1.00
Caesius—Grandiflora. Very choice hybrids	.35
Crinitus. Dainties little pink imaginable, soft fringy	.00
white blossoms. June - July. 5 inches	.50
Freynii. Bluish-grey cushions upon which sit the	
quaintest little pinks. Lovely for moraine	.50

3 inches. June - July.	
Octopetala. Compact and charming little shrublet	
with wee oak leaves and waxen flowers	.40
minute in all details.	.75
Sundermani. Larger and looser. The bloosom is on	
the yellow side.	.35
ERINUS (Scrophularicacae) Sunny rockeries and old walls	
or step corners. May - June. Alpinus Carmineus. Lovely rose-coloured variety	.35
Alpinus Alba, good white form of above	.35
Alpinus Dr. Haenele, brightest carmine, good and choice	.50
EDRIANTHUS, (See Wahlenbergia).	
ERIGERON (Compositae) Sunny position, gritty loamy soil. June - August. 2-9 inches.	
Alpina. Choicest little alpine daisy of soft lavendar	.40
Caucasicus. Similar to above but taller. Dainty soft	40
Compositus. Dainty little treasure in choice place in	.40
rock garden to associate with Viola Calcaratta,	
Douglasia Laevigata, etc.	.50

ERODIUM (Geraniacae) "Heron's Bill". Sunny situation, gritty soil.	
Amanum. Grey-green delicate foliage, with white	.50
Cheilanthifolio. Beautiful grey foliage, blush blooms with blotch on lower petals	.75
Chrysantha. Grey foliage with yellow blooms	.75
ERYTHRAE (Gentianacae) Likes gritty soil in full sun, some leafmold intermixed.	
Diffusa. A wee gentian-like plant, leaves hidden under profusion of bright pink blossoms in May and June.	.50
EPIMEDIUM (Berberidacae) Foliage plants for shade. Leaf-mold.	
Niveum. Snow-white flowers, beautiful heart shaped foliage	.40
Sulphureum. Dwarf pale yellow flowers, bronze foliage	.40
GENISTA (Leguminacae) Sandy loam in full sum. 6 to 9 inches. July - August.	
Prostrata. Dwarf creeping broom, wooly foliage	.50
tractive.	.40
Tinctora. Lovely warm colored yellow shrublet	.75 1.00
GENTIANA (Gentianacae) Well drained loamy soil. In some instances partial shade.	1,00
Acaulis. This is a favourite. Large rich blue trumpets,	
a marvel of colour in May - June. Often blooms again in Fall. Choice plants	1.00
Baicalense, fine type similar to Purdomi, producing dense heads of rich blue in August. 8 inches	1.00
Farreri. Large lovely sky-blue trumpets surrounded with grassy foliage. These are from choice iso-	
lated specimens	1.00
Lagodechaniana. Much like Septemfida. Low growing gentian of much charm	.75
Depressa. Very choice gentiana on the order of Verna.	,10
Peat and gritty soil, some moisture. Beautiful lobed cups.	1.25
Prezwalsky. Lovely flowers white specked, and intense	1.00

Purdomi, similar to above, long narrow foliage, with in-	
teresting cluster blooms spreading around plant	1.05
in a circle. Sunny, gritty soil. August	1.25
Septemfida. Reliable bloomer, good color and thrifty	.75
Sceptrum, similar to English Heath Gentian. Slender	. 10
stems with cluster of lovely blue-purple bells.	
September. Peat and moisture	.75
Verna. Lovely Spring Gentian. Bright blue stars with	
white center. Thrifty plants for Spring delivery	1.50
Sino-Ornata. This is considered the finest Chinese	
Gentian. Blooms in late autumn when bloom is	
scarce, rich indigo blue trumpets and will bloom	
until frost. No lime. Peat and moisture. Large	1.00
*	1.00
ERANIUM (Geraniacae). Most requiring sunny situation	
in light, gritty soil. 2 - 6 inches. June - August. Argenteum. This is a delicate little gem. Silver grey	
foliage, with apple blossom pink blooms	.75
Traversi. Grey-green foliage, clear pink blossoms	
Sanguineum (Lancastriense) Low growing prostrate	
with lovely pink blossoms	.40
Sanguineum Rosea. Rich rose shade of above	.50
Pylzowianum (North Thibet) Dainty little sprite with	
nodding rose-pink blossoms. Lovely in moraine.	# 0
June - August	.50
Wallichanum. Blue-veined purple. Good ground cov-	
or, or charming rock walls in warm location. August - September	.50
EEUM (Roscacae) Deep soil in sun or half shade. May -	.00
August. 4 - 9 inches.	
Borisii. Bright orange-scarlet flowers on short, branch-	
ing stems.	.50
Heldichii. Grey-green foliage, orange blossoms	.40
Montanum. Choice little yellow geum, interesting seed	
puff.	.50
GLOBULARIA (Selaginacae) Gritty soil half shade, in rock	
or crevices in rock garden. Very satisfactory rock	
plants. Cordifolia. Tiny prostrate shrublet, making good	
spread, and covered in early spring with dainty	
blue tassels	.40
Nana. Similar to above but very dainty foliage and	
dear little blue fluffy balls in early spring	.50

GYPSOPIHLA (Caryophylacae) Sunny position in rather	
poor soil.	
Cerastoides. Choice grey-green foliage with large	
	.35
Repens. Dainty foliage with fairy blooms, lovely in	
1 11	.25
rock wall.	
	.30
HELIANTHEMUM (Cistacae) Sunny position on rock wall	
or to droop over large rock in rock garden.	
Fairly poor soil for continuous bloom.	
	.50
	.50
	.35
	.35
Wenlock Pink. Grey foliage, lovely pink blossoms, con-	
	.35
	.35
Ben Ledi. Beautiful crimson lake flowers and hand-	
some foliage	.50
Ben Nevis. Yellow with orange center	.50
	.35
Wisley White. White crimped flowers, good bushy habit	.35

sun if soil is deep.	0.5
	.35
LaPerl. A new red coral bell	.40
	.50
	.60
Sanguineum splendens, mixed, from choice hand polen-	
ized seed	.25
HUTCHINSIA (Cruciferae) Prefers partial shade and a lit-	
tle dampness. Prostrate.	
Alpina. True little alpine, dark green foliage with pure	
1-14 - 61	.35
HYPERICUM (Hypericacae) Rock wall, good soil in full sun.	
Coris. Dainty little plant with very fine foliage and	
branching stems, lovely yellow blossoms. July	
and August. Partial shade for this one	.40
Olympicum, one of the finest in the group, compact	
bushes, very large golden blossoms	.40
Polyphyllum. Dense little bushes covered with large	
yellow cups all summer	.35
Repens. Good covering for large rock in sunny posi-	
tion	25

Fragile, somewhat like Polyphyllum, but daintier	35
HUSTONIA (Bluets) Half shade and leafmold.	
Coerulea, choice little blue flower completely cover-	
ing ample green mats of foliage. Comes very	
	35
IBERIS (Cruciferacae) Sunny situation.	
Gibraltica. This is choice lavendar colored one of the type	25
IRIS (Iridicacae) Partial shade for native Western types, full sun for all others.	
Western Native Iris. Tenas, Tenuis, Gormani, Chrysophylla, Bracteata, etc., all at	50
Arenaria. Daintiest little golden sand iris. This is scarce and very choice	
Bulleyana. From the Himalayas, soft blue, brown and	20
	50
Chrysographes. 18 inches. Another Iris from Asia.	
Very deep violet golden veined flowers. Rich	
moist soil in sun. Choice 1.	
Chrysofor. Another beautiful iris to plant near a pool . Cristata. Creeping iris of dainty habits. Prefers a lit-	75
tle shade and some moisture	35
Forresti. 14 inches. China. Beautiful yellow flowers	
with darker reticulation. A gem for a moist	
place in the rock garden or near a pool. Similar	0.0
to I. Gracilipes	00
garden. Resembles minute Japanese Iris. Un-	
usual and good	00

Tectorum Album. Choice white form of above	75
Tricuspis. Branching stems of blue-purple. Most at-	
	75 35
Reticulata. Imported choice iris, 14 inches. Bulbs for	שט
Fall delivery — 50c each. One dozen 6.	00
Fall delivery — 50c each. One dozen 6. Ruthenica. 8 inches. Roumania. Beautiful dwarf	
bright purple. Prefers light shade, well-drained	
	00
Wilsoni. Beautiful Chinese Iris, indescribable coloring 3.	οU
LEONTOPODIUM Alpine Edelweiss. High Alpine Swiss Type. Very large wooly flowers. In-	
teresting	

· ·	
Gnapthalian, Sibericus. Handsome type of the above. Spreading.	.50
LEWISIA (Portulaçae) Most Lewisias prefer full sun, light	.00
gritty soil. Cotyledon. Constant bloomer. Branching blush white	-
flowers Howellii. Beautiful native of Oregon. Lovely crinkled foliage, with radiating heads of apricot flowers	.50
streaked with rose. June-July. Very gritty soil, dry location	500
Columbianum. Roseum. Flat rosettes of dark ever- green foliage, deep rose flowers, good branching	
habit	.50
foliage, ample flower heads of rose with deeper stripe down each petal	.50
Tweedyi. This is the finest Lewisia obtainable. Lovely green foliage which throws up a glorious bloom resembling a waxen apricot water-lily. Gritty	
soil, sun. June	.75
rock garden, some are very fine. Bolanderi	
Kelloggi all three of these are dwarf and choice.	
LINARIA (Scrophulariacae) Sunny situation or partial shade. 4 inches. All summer.	
Alpina. Dainty little lavendar, yellow, and pink snapdragons. Choice for rock wall, paving flags,	
etcLINUM (Linacaea) Flax Full sun. Dry sandy soil.	.25
Alpinum. Dainty little flax of clearest blue	.50
Flavum. Profusion of yellow blossoms. Steady bloomer	.40
Salaloides. Nana. Pale mauve, completly prostrate, very choice for moraine	1.00
LITHOSPERMUM (Boraginacae) Sunny situation, sandy loam.	
Gramnifolium. Dainty little shrublet with pale blue blossoms diffusing into pink. Choice	.75
Intermedium. Glorius little shrublets, with bright blue flowers	.75
Frobeli, similar to above grey foliage	1.00

Prostratum. Heavenly blue, trailing habit, very choice for rock wall, or to droop over large rock. No lime.	.50
LOTUS (Leguminosacae)Sun or partial shade. Nice for shady rock wall.	.00
Corniculatus. Nice little pea-shaped flowers of clear yellow ferny foliage	.40
Corniculatus Flora Plena. Double form of above choice MALVESTRUM (Malvacae) Sunny place, sandy soil. Good	.50
in Wall. Coccineum. Lovely grey cut-foliage with the moste attractive flame colored tufts of silk. July - Aug.	.50
MAZUS (Scrophularicacae) Nice for stepping stones, paving flags, step corners.	
Rugosa. Good ground cover, with delicious little or- chid-like blossoms	.35
MECONOPSIS (Papaveraceae). Prefers well-drained moist soil.	
Baileyi. The choicest of all blue poppies. A real treasure. Requires quite an acid soil, leafmold, peat and grit, in half shade, with a good deal of moisture. June - July	1.50
flowers, 12 inches	1.00
Eichoides, beautiful plant from Himalayas. Sandy leaf soil. Sapphire blue flowers, 6 inches. August - September	.75
ern native, true alpine	.50
and must be moved in bulb form, in Fall Virginica. Beautiful Eastern native of China blue	.50 .40
MIMULUS (Scrophulariacae) Half shade, moist position. Lewisia, choice native pink mimulus	.35
Speciosa. Native yellow mimulus, creeper and quaint OMPHALODES (Boraginacae) Liking shady location, leaf-	.35
mold. Cappadocica (cornifolia). Handsome dwarf plant, grey- green foliage, for-get-me-not flowers of rarest blue in early Spring	1.00

Verna, similar to above, darker foliage and intense blue flowers	.50
ONOSMA (Borraginacae)	
Tauricum. The lovely golden drop, clear yellow blooms sweetly almond scented. Hot, dry location	1.00
Albo-Roseum. Grey-green foliage, white blooms diffus-	
ing rose, also sweet scented	1.00
OXALIS (Geraniacae) Gritty soil in sun or half shade. Beau-	
tiful subjects for rock garden. 4 inches, June -	
August.	
Adenophylla. Beautiful Chilean mountain plant. Pro-	
fusion of lovely grey-green foliage throwing up	
the daintiest blooms imaginable of softest lilac-	
pink. Very scarce and rare in America. I have	
secured a fine imported stock of these	1.50
Dozen1	2.00
Floribunda Rosea. The old favorite. Umbels of rose	
blooms all summer long. Appreciates shade	.50
Lavendar Dutchess. Beautiful lavendar blooms, very	.00
	.75
lovely ferny foliage	
Yellow Dutchess. Similar to above, yellow blooms	.75
Magellanica. Dainty little Oxalis for stepping stones	
and paving flags, or to use in steps, lovely sweet	
scented large flowering white blossoms	.75
PAPAVER (Rapaveracae) Sunny position, June - July.	
Alpinum laciniatum. Rare form of alpine poppy.	
Fringed flowers, orange and pink shades	.40
Alpine poppies, wonderful mixtures	.25
PENSTEMON (Scrophulariacae) Mostly sunny situation in	
gritty soil.	
Acuminatus. Gray foliage, gentian blue flowers	.50
Barrettae. Choice native of Oregon. Silvered foliage	.00
with most glorious lavendar snapdragons	.50
Bridgesii. Splendid scarlet type. Sunny location,	
sandy soil	.75
Eatoni, lovely crimson penstemon, one of the best, plant	
high in rock garden, in warm, sunny place	.75
Glabra. Large leafed type, deep purple blooms	.50
Heterophyllus. Choice violet-blue with pale throat	.35
Menziesii. Washington evergreen. Dainty creeper,	
large purple snapdragons	.35
Newberyii. Lovely deep pink flowers	.50
Procerus. Gentian blue flowers on ample stems. 14	.00
	25
inches	.35

Richardsoni. Spreading branches, violet - crimson blooms	.50
Rupicola. Choicest little penstemon, grey-green foliage, lovely large snapdragons of intense cherry-red coloring. Likes peat and gritty soil, 4inches	.50
Purpurea - Coerulus. Native of Oregon. Purple flowers. Coming late	.40
Rattani Minor. Dwarf heads of blue-lavendar flowers	.35
Scouleri. Evergreen, low bushes. In May and June lovely spikes of large lavendar snapdragons	.50
Scouleri Alba. Lovely white form of above	.75
I have also a collection of very interesting looking Idaho penstemons, which have not been named	.50
PERNETTYA Mucronata (Davidii hybrids) Fine Heather-like shrub, for rock garden, small green leaves, varied colored large berries. Shipping size	.75
PHLOX (Polemoniacae) Mostly preferring sunny place, sandy, gritty soil.	110
Amoena. Low-growing plant with large rose-lilac blooms.	.35
Adsurgens. Best of the native phloxes. Choice pink blooms, shiny green foliage.	.50
Divaracata. The early blue phlox. 10-12 inches, lovely with early tulips.	.30
Diffusa. Native. Creeping mats of lovely pale mauve and lavendar blossoms.	.40
Stolonifera. Eastern creeper, splendid in walls, nice for stepping stones, and flags	.40
Named varieties of Subulata types: Nivalis. White	.35
Nivalis. White	.35
G. F. Wilson. Lovely shade of lavendar	.40
Lilacina. Light mauve, wonderful for rock walls	.25
Sprite. Soft lavendar, tiny flower, very dainty	.40
Apple Blossom, very dainty palest pink	.35
Stoker's Variety, deep purple, strong contrasting colour. A good one and different	.75
PLUMBAGO (Leadwort) Valuable for walls, or half shade. 6-8 inches. August - September.	
Larpentae. Gentian blue flowers late in season. Fol-	
iage turns bronze, lovely to plant near turning	
maple	.40

POLEMONIUM (Polemoniacae) Polemoniums are lovely in	
Spring, handsome foliage and free bloom, for	
sun or shade.	40
Humile. Dwarf, with grey foliage, true alpine sort Reptans. Larger in every way, umbels of bright blue florest	.40
Prima Donna, similar type with large flowers	.35 .40
Pulcherrimum, native type with China blue blossoms	.35
Carneum. A native type with large flowers of cream and salmon.	.40
Confertum. Western native of rare beauty. Very	
dwart	1.00
POLYGONUM (Polygonacae) Partial shade, carpeters, or	
nice in rock wall.	
Vaccinifolium. Choice little creeper, lovely to cover a	
large rock. Throws up tiny spires of delicate rose	.50
POTENTILLA (Rosacae) Carpeters, and subjects for sunny	
places in wall or rock garden.	
Aurea. Quite dwarf, yellow blossoms.	.25
Cinerea. Compact grower, for stepping stones or paving flags.	.35
Fruticosa. Farreri, spreading shrublet from Thibet.	.00
	1.00
Nevadensis. Grey green tufts from Sierra Nevadas	.50
Nitida. Very choice, silver grey foliage, rose pink bloss-	
oms. This type is consistent bloomer	.75
Tonguei. Choice bi-color. Dwarf and good. Splendid	for
wall. Primrose, and brown combination	.00
PRIMULA (Primulacae). Rich loamy soil, in sun or partial shade.	
	-
Beesiana. Bog plant with large purple blossoms Bulleyana. Similar to above, buff orange flower	.75 .75
Cashmeriana, grandiflora hybrids. Beautiful lilac	. (1)
blooms	.50
Chionantha, lovely pale cream with black center, fra-	
grant	1.00
Florindae. Large bog type, for moist places. Huge	
yellow umbels	1.00
Geraldiana. Quite dwarf, hairy leaves and delicate pur-	1.00
Farinosa. Dainty little bird's foot primula, pink - lav-	1.00
endar flowers. English type	.40
Farinesa Schottica Choice form of the above	

King days Chairs universe and a filter than he	
Frondosa. Choice primula on order of the above but larger and more lush mealy leaves	.40
Capitata Mooreana. Choice little primula with deep	
purple blossoms, does well in sunny place	.50
with delicious deep carmine flowers. Moist place	.50
white, sometimes pink, blossoms in early spring .	.50
Wardii. Similar to above, smaller in every detail	.75
ored flowers, powdered inside with white meal.	
July - August 1. PULMONARIA (Borraginacae) Likes some moisture, will	.00
grow in sun or shade, May - June.	
Angusifolia Azurea. Low growing herbaceous plants with numerous lovely bright blue flowers in earli-	
	.35
Pulmonaria, Mrs. Moon, rose colored form of above.	.75
Good	. (1)
for best results.	
Pyrenaica. Dark green crinkled foliage plant for primula family, glorious lavendar bloom	.00
CHODODENDRUN (The Alpenrose). Sunny place or half shade, gritty, peaty soil.	
Ferrugineum. Beautiful dwarf evergreen, charming	
pink flowers in June - July	.00
garden with soft pink blossoms. Extra choice 2.	.50
ROSA ROULETTI. From Roumania, 6 inches, sweet scented semi-double little pink roses. Very choice	.00
SAPONARIA (Caryophyllacae) For rock wall or sunny place	
in rock garden. Good to plant in barren place for ground cover.	
Ocymoides Splendens. Good pink bloomer to combine	0.5
with early spring subretias	.25
est race of true Alpines. Many varieties, some	
mat forming, many encrusted with limy pits on foliage, some mossy types for shade, but all very	
charming and interesting, these with the sedums and sempervivums, make a nice hobby for a	

very distinct, prefers a little shade

.35

.50

collector, alone. For convenience I list them

KABSCHIA SECTION: This is mat forming type, to be use	
in moraine, or crevice between two rocks. All	
are early bloomers. Like warm, sunny situation,	
in gritty soil and leafmold.	
Apiculata. Mats of spiny foliage, primrose vellow bloss-	
oms	.40
Apiculata Alba. Nice white form of the above	.40
Boryii. Compact grey-green cushions with large white	
blooms in early Spring. A little gem.	1.00
Caesia. Very compact mat-forming type with dainty	
white bloom	1.00
Cherry Trees, new hybrid. Charming dark green foli-	
age, yellow blooms	1.00
Faldonside. Grey-green foliage, yellow blossoms	1.25
Buseriana. Magna. Glorious little plant with choice	
white blossom	1.50
Buseriana Sulphurea. Beautiful yellow blooming type	
of the above	1.50
Elizabethae. Small cushions green foliage, deep yellow	
blooms	.75
Ferdinand-Coburg. Grey-green rosettes similar to a-	
bove, deeper yellow blossoms	.75
Frederici-Augusti. Large rosettes on the order of Med-	
ia, bracts of purplish flowers. Choice and rare	1.50
Greisbachi. Similar to above, reddish blooms, interest-	
ing, rare	1.50
Kyrilli. Hybrid after same type as Marginata. Very	
choice grey mats, with clearest yellow blossoms.	1 50
Rare.	1.50
Haagii. Small plant with brilliant yellow blooms Lutea-Viridis. Green mats, yellow blossoms. Dainty	.50 .50
Godseffiana. (SS. Elizabethae-Sancta) Spreading mat	.50
of blue-grey, yellow blossoms	.50
Irvingii. Little hybrid of great beauty, with pink bloss-	.00
oms, one of the very choicest	1.25
Paulinae. Beautiful pale yellow sax. One of the new	1,20
ones	1.00
Petraschii. Choice little silvery spiny cushions, lovely	2.00
sweet scented flowers	1.25
Marginata. Compact little encrusted rosettes, very	
dainty little white blossoms	.50
Myra. New hybrid, very choice deep rose bloom, a de-	
parture to the white and vellow forms	1.50

Media. Large flat rosettes, compact and interesting Scardica, splendid new hybrid, hardy, grey foliage,	1.50
	1.25
Stribyrni, distinct species from Balkans, purple flowers	1.25
Riverslea. Choice new hybrid. Lovely deep cherry-rose	
blossoms	1.50
MOSSY SECTION: These form cushions and mossy mats.	
Are especially nice for place in damp, shady part	
of rock garden. Like plenty of leafmold, and ap-	
preciate an extra mulch in spring and fall.	
Bathonensis. Good bloomer, and one of the best of the	
colored ones. Deep pink	.35
Guildford's Seedling. Bright Crimson, one of the best	.40
H. S. Stokes. Bright red	.50
Red Admiral. The best mossy	.75
James Bremmer. Delightful pink mossy	.50
Moschata, Rhei Surperba. Another nice pink bloomer,	
and easySir Douglas Haig. Bright red	.35
Sir Douglas Haig. Bright red	.50
Wallacei. Large white mossy. Very good	.40
PORYPHRION SECTION: For moist places in rock garden, all prefering afternoon shade, well to plant north	
or east exposures.	
Oppositifolia Splendens. This is a very early bloomer	
with lovely rose-purple blossoms. Rare and choice	.75
Allionii. Minute white flowered mossy, likes damp,	
cool and gritty moraine bed	.40
Bronchialis. Similar, large type, prefers hade and	40
moisture	.40
family, likes moisture and shade	.35
Cuneafolia. A tiny London Pride, with dainty pink	.00
flowers.	.50
Primuloides. Elliott's variety. Tiny compact London	
Pride. Similar to above	.50
SEDUM (Crassulaçãe) Stonecrops. Sun-loving plants, excell-	
ent for old walls.	
ent for old walls, dry banks, stepping stones,	
and moraine. Light soil. Acre. Evergreen carpeter. Gold flowers	.15
Album. Green foliage, white flowers, sweet scented.	
Satisfactory	.25

Anglicum. Grey-green foliage, delicious little pink- white blooms. This is the true form	.35
Brevifolium. Choice little Sedum. Tinted succulent foliage, dainty white blooms with pink anthers.	100
Likes dry place	.35
Dasyphyllum. Blue-grey beads throwing up sprays of softest pink	.25
Ewersii. Grey-blue succulent leaves, charming rose flowers coming late in the season	.35
Hispanicum. Grey, green and misty. Very attractive. Perennial form	.25
Kamschaticum. Fine species, with large orange blossoms. Splendid for walls, nice in corner of steps. On Spurium order.	.25
On Spurium order	.15
leaves, choice yellow blooms Murale. Album. White form, splendid for stepping	.35
stones	.15
Murale. Coccineum. Rose flowering type	.15
Pulchellum. Star shaped sedum, with lovely pink blossoms, likes a little shade, and very happy in	.40
moisture	.40
choice, with clear yellow blososms	.40
which turn red in late summer. Attractive	.25
Pruinatum Fosterianum. Large spiny foliage, deep rose stems	.25
Siebolan. One of the best. Blue-grey foliage, rose blooms, late	.35
Stolonifera. Attractive bronze red foliage, lovely pink blossoms. Fine to plant near some of the dwarf	0.5
campanulas	.25
spring. Choice Spectabilis. Deciduous specie from Japan Succulent	.40
foliage, lovely pink blossoms late in summer. Lovely with Campanulas of Carpatica type.	.35

Spurium. A splendid sedum for ground cover, walls,	.2
or corner of steps. Spurium Rosea grandiflora, similar to above, satisfactory rose blooms for long period, in August and September	.3
SEMPERVIVUM. Succulent rosetted types for warm situations. I have many types of this specie. 1 have just about given up keeping them named, however. I am pricing them all at about twenty-five cents, and for those who like to make a collec-	
tion I would be glad to send them a number of varieties mixed, all different, but please don't ask me to name them. I have planted the same specie in four different locations in my rock garden, and they have all developed different tendencies. So I give up. However, I do know the following are true to type:	
Arachnoideum. The tiny houseleek of cob web type Brownii. Distinct brownish tipped, sharply pointed little rosettes	.2
Doeleanum. Attractive bi-colored rosette. Globiferum. Resembling tight little globular rosette Laggeri. Grey-green rosette with light cob web, larger than arachanoidia.	.2
Montanum, similar to Laggeri Tectorum. Common houseleek. Triste. Sharply pointed	.1
For those enthusiasts who are interested in classification of Semperviva, why not subscribe to the National Horticultural Magazine, published at 116 Chestnut Street, TaKoma Park, D. C. This splendid little magazine has been publishing a translation of Henri Correvon's work on the classification of the specie, it is very interesting and authentic. It is worth many times the price of the subscription alone.	
SHORTIA (Dispendiacae) Plants for shady places, under trees, etc. Galacifolia. Most charming delicate evergreen, turning bronze in Fall. Delicate pink flowers in earliest spring.	.5
SILENE—(Caryphyllacae) Liking a sunny place, in mostly sandy soil.	

Acaulis. Delicious little emerald-green cushions with most delicate pink blossoms. June - July	.40
Elizabethae. Beautiful cushions, sharp pointed leaves,	
throwing up luscious rose pink silene blossoms Hookeri, native from Southern Oregon, and California.	
Very beautiful forms, likes sunny sandy place Maritima. Grey mat forming foliage, apple blossom	.50
pink flowers. Quadrifida. Rare and choice little alpine, bearing	.25
loosely deep-notched white flowers in June -July.	.50
Shafta. A fall bloomer, deep blossoms	.35
SOLDANELLA (Primulacae) Liking shady or partial shade, in rich soil composed of grit and leafmold. Early spring as soon as the snow goes off.	
Alpina. Delightful high Alpine. Lovely violet, gringy flowers	1.00
SYNTHYRIS (Scrophularicacae) Native woodland plant in very early spring. Shade and leafmold.	
Reniformis. Lovely green foliage with spikes of azure blue, very charming little native	.40
Rotundifolia. Similar to above, smaller in detail, lovely	
and dainty wee blue blossoms	.25
dark blue spires. One of our high Mt. Alpines	1.00
THYMUS (Labiate) Mat forming Thymes to cover rocks, plant between stepping stones and paving flags.	
Serpyllum Alba. Sweet scented creeping thyme, choice little ground cover, white blossoms	.25
Serpylllum Coccineum. Deep rose blooming type	20
Nummularia, dark shiny green leaves, good	.30
est leafed variety	.50
Lanuginosa, wooly evergreen carpeter, softest grey VERONICA (Scrophularicacae) This specie contains some	.25
of our best blue flowering plants. Many are prostrate, and a number are shrubby.	
Amethystina. Light lavendar blooms in May and June Gutheriana. Neat little evergreen bushlets, very deep	.25
blue blossoms with white eye	.40
Incana. Silvery foliage, with spires of deep dark bloss- oms. Fine for rock wall	.25

Prostrate (Rupestris) Trailing and mat-forming plant with abundant spigs of lovely gentian blue bloss-	.25
Prostrata Rosea. Lovely rose type of the above.	.40
Teucrim dubia, Shirley Blue. Very fine introduction, spikes of very delightful blue	.50
Teucrim dubia Rosea. Rose form of above	.50
Teucrim dubia Trehani, yellow foliage with very lively blue blossoms, a very striking contrast. Some shade	.40
Repens, good ground cover with China blue flowers Saxatalis. Forms prostrate mats, shiny foliage, deep blue flowers	.25
Autumn Glory. Beautiful new hybrid, blooming very late, decidedly line colour	.40
VIOLA (Violacae) The Violas are charming subjects for the rock garden. Nothing is more interesting than making a collection of the native and foreign alpine violas, there are so very many distinctive types. Mostly prefer half shade, and are thankful for a well nourished soil.	
Arenaria Rosea. Dear little tufted violet of the loveliest rose color. Splendid bloomer, and will thrive in sun.	.35
Bosniaca. Deep rose viola from Central Europe	.25
Calcaratta. This is the rare little alpine from Upper Mountain regions, true to type, comes lavendar yellow and purple	.40
Gracilis. Delicious little Grecian Viola, flowers of in-	
tense deep purple	.50
Viola Cenisia. Very rare and delightful high alpine viola. Deep rich purple with lovely golden center Pedata. Bird's foot Viola, lovely layendar blooms	1.00
Pedata. Bird's foot Viola, lovely lavendar blooms Pedata Bi-color. Bi-color form of the above. Very choice	.50
Maggie Mott. Charming mauve bedding viola, diffused white near the dainty eye. Rare in good types Moseley's Perfection. Lovely yellow viola, imported at	.50
same time as above from England, and a very	.50

Nellie Vine, lovely lemon yellow, very clear and good	.50
White Jersey Gem. Clear white sport of the popular Jersey Gem.	.35
Riviviana. True alpine viola, lovely little pale blue flowers for weeks at a time, will bloom in full sun	.35
HLENBERGIA (Campanulacae) Also Edrainthus. Sunny places in wall or rock garden.	
Gramnifolia. Grey-green foliage, intense blue cups in whirls	.50
Kitabeli. Similar to above but shorted leaves, lovely blooms	.50
Serpyllifolia. Lovely plant from Dalmatia. Large beautiful purple bells in July. Good wall plant	.50
Pumilio. This is a little jewel. Very dainty, grassy grey-green foliage, with dainty blue cups	.75

WA

Note

This little catalogue will, no doubt, reach the hands of many enthusiasts who are well acquainted with its contents, but I want those who are not so well informed to feel free to write me for any information they may desire with regard t othe building of their rock gardens, soil, etc., and I should be only too happy to give special instructions and requirements regarding any of the plant material listed herein. I sincerely wish to feel that my customers are also my friends.

There may be some good friends who may be sceptical as to my extravagant terms of lovely, delightful and beautiful, but in explanation to this, I just want to assure you that I have tried to list only the most worthy types of rock plants and alpines, trying to keep my catalog as exclusive as is possible, and trying in reality to list only the loveliest and most beautiful types of each specie.

LIST of SCREE or MORAINE PLANTS

Androsace Brigantiaca Androsace Laggeri Androsace Lactea Villosa Vitaliana Ameria Caespitosa Campanula Excisa Campanula Waldestiana Campanula Rainieri Campanula Zoysii Dianthus Alpinus Dianthus Callizonas Dianthus Frevnii Dianthus Microplesis Douglasia Vitaliana Douglasia Laevigata Draba in variety Gentiana Verna Leonotopodium
